NEX AI — CANDIDATE HIRING EVALUATION REPORT

Ø=Ü¼ Candidate H

Confidential Pre-Employment Competency & Technical Assessment

CANDIDATE NAME:	AAA	**CANDIDATE / REF ID:**	AA
TARGET POSITION:	Frontend Developer	**EVALUATION DATE:**	11/6/2026 06:12 PM

1. EXECUTIVE CANDIDATE SUMMARY & HIRING RECOMMENDATION

DECISION: DO NOT HIRE

Candidate Overview & Evaluation:

The candidate presents a strong academic foundation in Computer Science and demonstrates proficiency in modern frontend frameworks including React and Next.js. However, the candidate failed to provide substantive technical responses to behavioral and architectural interview questions, indicating a significant gap between their resume assertions and practical application experience.

Hiring Decision Rationale:

The candidate provided non-responsive, incoherent input ('sqwdefrgth', 'swdefrg', etc.) to all open-ended technical and behavioral questions. Despite a strong academic background, the failure to articulate basic architectural decisions or project experiences during the interview makes them unsuitable for a professional role.

2. TECHNICAL SKILLS & ROLE BENCHMARK MATCH

Verified Candidate Competencies:

Python | JavaScript | React.js | Next.js | Data Structures & Algorithms

Target Competencies Needing Onboarding Focus:

State Management (Redux/Zustand) | Architectural Design Patterns | Professional Communication | Technical Problem Solving

Technical Depth & Competency Analysis:

While the candidate passed the technical MCQs regarding JavaScript/TypeScript configurations, they were unable to demonstrate the application of these skills in a real-world context. The lack of ability to explain state management trade-offs suggests a theoretical knowledge base without practical implementation experience.

Coding MCQs Output Accuracy: 1/2 (50%)

3. RESUME VERIFICATION & REAL-WORLD PROBLEM SOLVING

Resume Credibility & Evidence Verification (Score: 2/10):

Bachelor of Technology student at VNR Vignana Jyothi Institute | Internship at KGIT

Problem Solving Under Constraints:

The resume lists advanced technical skills; however, the interview responses failed to substantiate any of these claims. The candidate could not describe a single project, complex UI component, or technical disagreement, rendering the resume claims unverifiable through direct questioning.

4. TEAM COLLABORATION & CULTURAL SYNERGY

Score: 1/10 (Developing)

Collaboration Style & Teamwork Fit:

The candidate failed to engage with behavioral or collaborative prompts, providing unintelligible text instead of evidence of teamwork or conflict resolution. There is no evidence of the candidate's ability to operate within an engineering team.

5. KEY CANDIDATE STRENGTHS & VALUE MULTIPLIERS

- Strong academic record (9.25 CGPA)
- Broad theoretical exposure to AI/ML and full-stack tools
- Proficiency in coding syntax/logic as evidenced by MCQs

Growth Areas for 90-Day Ramp:

- Technical articulation and communication skills
- Practical application of state management patterns
- Ability to provide concrete examples of past work
