NEX AI — CANDIDATE HIRING EVALUATION REPORT

Ø=Ü¼ Candidate H

Confidential Pre-Employment Competency & Technical Assessment

CANDIDATE NAME:	Afsheen	**CANDIDATE / REF ID:**	c
TARGET POSITION:	Data Scientist	**EVALUATION DATE:**	11/11/2026 01:37 PM

1. EXECUTIVE CANDIDATE SUMMARY & HIRING RECOMMENDATION

DECISION: DO NOT HIRE

Candidate Overview & Evaluation:

Afsheen cannot be recommended for the Data Scientist position. The respondent typed non-substantive/rubbish text ("No necessary", "Not interested", "Thank you", "Hmm") across 6 of 9 open-ended interview questions, which does not provide any technical answers to the questions asked. While Coding MCQ accuracy was 1/3 (33%), selecting multiple-choice options cannot substitute for answering open-ended technical and project verification questions.

Hiring Decision Rationale:

Do Not Hire: The respondent typed non-substantive/rubbish text ("No necessary", "Not interested", "Thank you", "Hmm") across 6 of 9 open-ended interview questions, which does not provide any technical answers to the questions asked. Resume claims cannot be credited when the candidate responds with "No necessary", "Not interested", "Thank you", "Hmm" instead of providing technical answers.

2. TECHNICAL SKILLS & ROLE BENCHMARK MATCH

Verified Candidate Competencies:

Code Output Tracing (MCQ Only — Open-Ended Questions Unanswered)

Target Competencies Needing Onboarding Focus:

Python | Machine Learning | Pandas & NumPy | Scikit-Learn | Statistical Modeling | SQL | Deep Learning (PyTorch/TensorFlow) | Data Storytelling

Technical Depth & Competency Analysis:

The respondent typed non-substantive/rubbish text ("No necessary", "Not interested", "Thank you", "Hmm") across 6 of 9 open-ended interview questions, which does not provide any technical answers to the questions asked. Because the candidate typed "No necessary", "Not interested", "Thank you", "Hmm" rather than explaining their architecture, implementation decisions, or debugging process, they demonstrated zero open-ended technical depth. While Coding MCQ accuracy was 1/3 (33%), selecting multiple-choice options cannot substitute for answering open-ended technical and project verification questions.

Coding MCQs Output Accuracy: 1/3 (33%)

CORRECT	MCQ #1: Option A: [80, 40]
INCORRECT	MCQ #2: Option A: {'learning_rate': 0.01, 'epochs': 100, 'batch_size': 32, 'optimiz (Correct: Option C — {'learning_rate': 0.01, 'batch_size)
INCORRECT	MCQ #3: Option D: [60, 120] (Correct: Option A — [60, 60])

3. RESUME VERIFICATION & REAL-WORLD PROBLEM SOLVING

Resume Credibility & Evidence Verification (Score: 1/10):

None — Resume claims were not substantiated due to non-responsive answers

Problem Solving Under Constraints:

Resume credibility is scored 1/10. Although the uploaded resume lists technical projects and skills, typing "No necessary", "Not interested", "Thank you", "Hmm" in response to verification questions provides zero evidence of genuine project ownership.

4. TEAM COLLABORATION & CULTURAL SYNERGY

Score: 1/10 (Developing)

Collaboration Style & Teamwork Fit:
Responding with "No necessary", "Not interested", "Thank you", "Hmm" to behavioral and peer review questions demonstrates a complete lack of professional technical communication.

5. KEY CANDIDATE STRENGTHS & VALUE MULTIPLIERS

Answered 1/3 (33%) coding output MCQs correctly

Growth Areas for 90-Day Ramp:

Must provide substantive technical answers instead of one-word or rubbish text

Ability to articulate real-world project architecture and engineering decisions
