NEX AI — CANDIDATE HIRING EVALUATION REPORT

Confidential Pre-Employment Competency & Technical Assessment

Ø=Ü¼ Candidate H

CANDIDATE NAME:	CCCC	**CANDIDATE / REF ID:**	CC
TARGET POSITION:	Frontend Developer	**EVALUATION DATE:**	10/28/2026 03:33 PM

1. EXECUTIVE CANDIDATE SUMMARY & HIRING RECOMMENDATION

DECISION: DO NOT HIRE

Candidate Overview & Evaluation:
Candidate CCCC presents a strong academic record on paper but failed to demonstrate baseline technical proficiency or communication capabilities during the interview evaluation. The candidate was unable to explain basic React or Next.js concepts, failed both coding MCQs, and offered single-word or evasive responses across all behavioral and technical questions. Consequently, the candidate does not meet the technical or functional threshold for a Frontend Developer role.

Hiring Decision Rationale:
The candidate failed to demonstrate any functional knowledge of React/Next.js despite listing them on the resume, answered both Python MCQs incorrectly, and provided non-responsive single-word answers ('Ok', 'Yeah', 'Yes') across technical, collaboration, and resume verification prompts.

2. TECHNICAL SKILLS & ROLE BENCHMARK MATCH

Verified Candidate Competencies:

- Basic Theoretical Computer Science Concepts (Academic)

Target Competencies Needing Onboarding Focus:

- React.js & Next.js Core Architecture (SSR, SSG, State Management)
- Asynchronous JavaScript & API Race Condition Handling
- Python Mutability & Object References
- Frontend Performance Optimization

Technical Depth & Competency Analysis:
The candidate demonstrated significant skill gaps across basic frontend development concepts. When asked about SSR vs SSG in Next.js, the candidate stated they did not know the topic. When asked how to handle asynchronous race conditions in React, the candidate gave an irrelevant response ('I use .http file to handle'). Additionally, the candidate failed both technical MCQs regarding Python mutability and reference semantics.

Coding MCQs Output Accuracy: 0/2 (0%)

3. RESUME VERIFICATION & REAL-WORLD PROBLEM SOLVING

Resume Credibility & Evidence Verification (Score: 1/10):
Problem Solving Under Constraints:
None of the candidate's resume claims regarding React, Next.js, or full-stack web application development could be substantiated. When specifically asked to detail a project and their contribution to state management and rendering strategy, the candidate responded with only 'Ok'.

4. TEAM COLLABORATION & CULTURAL SYNERGY

Score: 1/10 (Developing)

Collaboration Style & Teamwork Fit:
The candidate displayed negligible effort in communicating during the evaluation, responding with single words ('Yeah', 'Yes', 'Ok') or contradictory statements ('When did I mention'). There was zero evidence demonstrated regarding teamwork, code review adherence, or constructive conflict resolution.

5. KEY CANDIDATE STRENGTHS & VALUE MULTIPLIERS

- **Strong academic CGPA (9.25/10) at institution level**
- **Broad academic coursework exposure in Computer Science**

Growth Areas for 90-Day Ramp:

- **Practical execution and deep knowledge of React and Next.js ecosystems**
- **Professional communication and technical articulation during interviews**
