NEX AI — TALENT EVALUATION REPORT

Confidential HR Competency, Risk & Engagement Assessment

EMPLOYEE NAME:	Charan	**EMPLOYEE ID:**	EMP-101
TARGET POSITION:	Frontend Developer	**ASSESSMENT DATE:**	10/26/2026 11:23 PM

1. EXECUTIVE SUMMARY OF EMPLOYEE

Performance & Assessment Overview:
Charan presents a strong academic and technical resume with a focus on React, Next.js, and full-stack development. However, the candidate displayed completely uncooperative and dismissive behavior during the assessment through keyboard smashes and short refusal phrases, completely invalidating the interactive evaluation.

Verified HR Background & History:
3 years developing responsive SaaS applications, React & TypeScript expertise

2. TECHNICAL SKILLS & COMPETENCIES

Demonstrated Core Competencies:

React.js | Next.js | JavaScript | HTML5 & CSS3 | Tailwind CSS

Target Growth Opportunities & Upskilling Areas:

TypeScript | State Management (Redux/Zustand) | REST & GraphQL APIs | Web Performance & SEO

Technical Competency Evaluation:
While the resume indicates hands-on frontend experience with React and Next.js, the candidate completely failed to demonstrate technical depth, architectural understanding, or practical problem-solving during the assessment due to uncooperative responses.

3. EMPLOYEE ENGAGEMENT & MOTIVATION

Score: 1/10 (Low)

Engagement Assessment & Drive:
The candidate showed extremely poor engagement, repeatedly responding with keyboard smashes ("e3r", "defrg") and dismissive remarks ("nah i wont", "nope"). This indicates a total lack of interest or professional compliance during the evaluation process.

4. ATTRITION RISK & RETENTION STRATEGY

Risk Level: High

Observed Risk Factors:
- Complete refusal to participate in the assessment process
- Disregard for professional evaluation standards
- Potential behavioral and cultural fit issues

HR Retention Guidance & Recommendations:
Conduct an immediate direct conversation with Charan to address the unprofessional assessment conduct, evaluate their genuine interest in the role, and establish clear behavioral expectations.

5. COLLABORATION & TEAM DYNAMICS

Score: 2/10 (Developing)

Collaboration Style & Synergy:
Despite HR feedback highlighting proactive collaboration and sprint reliability, the candidate's dismissive communication during the assessment reflects poorly on professional maturity and interpersonal engagement in a formal setting.

6. WELL-BEING & WORKLOAD BURNOUT INDEX

Burnout Index: 5/10 (Moderate)

Workload Observations:
There are no direct indicators of workload-induced burnout, as the evasive responses appear driven by disinterest or resistance rather than exhaustion, though balancing studies and work remains a noted background factor.
