NEX AI — EMPLOYEE WORK SKILLS & PERFORMANCE R

Ø=ÜÈ Work Skills App

Confidential Internal Competency & Execution Appraisal

EMPLOYEE NAME:	VISHNU	**EMPLOYEE ID:**	EMP-101
TARGET POSITION:	Full Stack Developer	**EVALUATION DATE:**	10/30/2026 05:49 PM

1. WORK PERFORMANCE SUMMARY & RATING

RATING: MEETS EXPECTATIONS

Work Skills Executive Summary:
Vishnu is a dependable Full Stack Developer who demonstrates strong sprint execution, practical API contract design, and proactive peer collaboration during code reviews. While he reliably delivers features in frontend React/TypeScript and backend SaaS workflows, his technical execution is constrained by a reliance on manual testing and a lack of formal automated test suites and production debugging experience.

Performance Appraisal Insights:
Vishnu consistently meets delivery deadlines and exhibits strong team alignment, as reflected in manager feedback and his contract-first problem-solving approach. However, his engineering methodology shows vulnerability in testing automation and system resilience under load, keeping his overall performance at a solid mid-level benchmark.

2. CORE WORK COMPETENCIES & TECHNICAL MASTERY

Demonstrated Work Competencies:

- React & TypeScript Modern UI Development
- RESTful API Integration & Contract Interface Design
- Node.js & Express SaaS Architecture Basics
- Redis Caching & Bulk Database Operations
- Git & Collaborative Code Review Practices

Target Upskilling Competencies:

- Automated Unit & Integration Testing (Jest, React Testing Library)
- End-to-End Test Automation (Playwright / Cypress)
- Database Connection Pooling & Asynchronous Error Resilience
- Production Observability, Profiling, & Memory Leak Triage

Technical Execution Analysis:
Vishnu displays good domain knowledge in building responsive frontend components and defining clean modular backend interfaces. However, his code craft lacks rigorous quality assurance practices; substituting standardized testing frameworks with manual checks and ad-hoc scripts increases regression risk in production environments.

Coding MCQs Output Accuracy: 1/2 (50%)

3. EXECUTION QUALITY & OPERATIONAL EFFICIENCY

Score: 6/10 (Moderate)

Delivery Velocity & Code/Work Quality:
Vishnu maintains good sprint cadence and actively resolves team bottlenecks through early interface definitions. However, execution efficiency is hindered by manual verification habits and a lack of CI/CD-integrated automated quality gates.

4. PROJECT DELIVERY, OWNERSHIP & BUSINESS IMPACT

Ownership: 7/10

Value Delivered to Team:
Successfully spearheaded the integration of the NEX AI evaluation module by establishing clear API specifications to decouple frontend and backend workflows, and refactored monolithic evaluation logic to enhance system maintainability.

5. PROFESSIONAL UPSKILLING & DEVELOPMENT ROADMAP

- **Implementation of Jest and React Testing Library for baseline automated unit coverage**
- **Integration of Playwright automated test suites into CI/CD deployment pipelines**
- **Advanced Node.js performance tuning, structured connection pooling, and APM production profiling**
