NEX AI — CANDIDATE HIRING EVALUATION REPORT

Ø=Ü¼ Candidate H

Confidential Pre-Employment Competency & Technical Assessment

CANDIDATE NAME:	Vamshi	**CANDIDATE / REF ID:**	CAND. 101
TARGET POSITION:	Backend Developer	**EVALUATION DATE:**	11/11/2026 01:43 PM

1. EXECUTIVE CANDIDATE SUMMARY & HIRING RECOMMENDATION

DECISION: DO NOT HIRE

Candidate Overview & Evaluation:

Vamshi cannot be recommended for the Backend Developer position. The respondent typed non-substantive/rubbish text ("Didn't face", "None", "ok", "durewe") across 6 of 6 open-ended interview questions, which does not provide any technical answers to the questions asked. While Coding MCQ accuracy was 0/3 (0%), selecting multiple-choice options cannot substitute for answering open-ended technical and project verification questions.

Hiring Decision Rationale:

Do Not Hire: The respondent typed non-substantive/rubbish text ("Didn't face", "None", "ok", "durewe") across 6 of 6 open-ended interview questions, which does not provide any technical answers to the questions asked. Resume claims cannot be credited when the candidate responds with "Didn't face", "None", "ok", "durewe" instead of providing technical answers.

2. TECHNICAL SKILLS & ROLE BENCHMARK MATCH

Verified Candidate Competencies:

None — Rubbish / non-technical responses provided

Target Competencies Needing Onboarding Focus:

Node.js | Python | Java | RESTful APIs | PostgreSQL / SQL | MongoDB / NoSQL | Microservices | Docker | System Design

Technical Depth & Competency Analysis:

The respondent typed non-substantive/rubbish text ("Didn't face", "None", "ok", "durewe") across 6 of 6 open-ended interview questions, which does not provide any technical answers to the questions asked. Because the candidate typed "Didn't face", "None", "ok", "durewe" rather than explaining their architecture, implementation decisions, or debugging process, they demonstrated zero open-ended technical depth. While Coding MCQ accuracy was 0/3 (0%), selecting multiple-choice options cannot substitute for answering open-ended technical and project verification questions.

Coding MCQs Output Accuracy: 0/3 (0%)

- INCORRECT — MCQ #1: Option C: ['v22', 'v18', 'v14'] (Correct: Option B — ['v18', 'v22'])
- INCORRECT — MCQ #2: Option A: [('active', True), ('env', 'prod'), ('port', 9000)] (Correct: Option C — [('env', 'prod'), ('port', 9000)])
- INCORRECT — MCQ #3: Option D: [10, 10] (Correct: Option A — [11, 11])

3. RESUME VERIFICATION & REAL-WORLD PROBLEM SOLVING

Resume Credibility & Evidence Verification (Score: 1/10):

None — Resume claims were not substantiated due to non-responsive answers

Problem Solving Under Constraints:

Resume credibility is scored 1/10. Although the uploaded resume lists technical projects and skills, typing "Didn't face", "None", "ok", "durewe" in response to verification questions provides zero evidence of genuine project ownership.

4. TEAM COLLABORATION & CULTURAL SYNERGY

Score: 1/10 (Developing)

Collaboration Style & Teamwork Fit:
Responding with "Didn't face", "None", "ok", "durewe" to behavioral and peer review questions demonstrates a complete lack of professional technical communication.

5. KEY CANDIDATE STRENGTHS & VALUE MULTIPLIERS

- No verifiable technical strengths demonstrated during interview

Growth Areas for 90-Day Ramp:

- Must provide substantive technical answers instead of one-word or rubbish text
- Ability to articulate real-world project architecture and engineering decisions
