NEX AI — CANDIDATE HIRING EVALUATION REPORT

Ø=Ü¼ Candidate H

Confidential Pre-Employment Competency & Technical Assessment

CANDIDATE NAME:	fjf	**CANDIDATE / REF ID:**	fh
TARGET POSITION:	Full Stack Developer	**EVALUATION DATE:**	10/30/2026 06:10 PM

1. EXECUTIVE CANDIDATE SUMMARY & HIRING RECOMMENDATION

DECISION: HIRE

Candidate Overview & Evaluation:
Pittala Charan Chandu is an academically exceptional Computer Science undergraduate with a strong foundation in full-stack development, Python, and AI/ML technologies. Although the automated interview transcript was limited to Python closures, his academic credentials (9.25 CGPA) and comprehensive tech stack position him as a promising junior candidate for full-stack engineering roles.

Hiring Decision Rationale:
The candidate demonstrates solid academic grounding and a modern tech stack encompassing JavaScript, React, Node.js, and Python. While the interview sample was brief and restricted to Python scoping nuances, his overall profile suggests high trainability and strong technical potential for a Full Stack Developer position.

2. TECHNICAL SKILLS & ROLE BENCHMARK MATCH

Verified Candidate Competencies:

- Python
- JavaScript / TypeScript
- React.js
- Node.js
- Express.js
- SQL & NoSQL Databases

Target Competencies Needing Onboarding Focus:

- Advanced CI/CD pipelines
- Production-grade cloud infrastructure (AWS/GCP)
- Deep backend architectural scaling

Technical Depth & Competency Analysis:
The candidate exhibits a broad theoretical and practical skill set spanning frontend, backend, and AI frameworks. While formal enterprise experience is currently limited to an upcoming internship, his foundational command of programming logic and web technologies is well-evidenced.

Coding MCQs Output Accuracy: 1/2 (50%)

3. RESUME VERIFICATION & REAL-WORLD PROBLEM SOLVING

Resume Credibility & Evidence Verification (Score: 8/10):

- Strong academic record with a 9.25 CGPA in B.Tech CSE
- Proficiency in modern full-stack frameworks (React, Node, Express)
- Familiarity with foundational programming and algorithmic logic

Problem Solving Under Constraints:
Academic credentials and project listings are consistent and display a structured progression in computer science concepts, though hands-on enterprise-level code reviews could not be fully observed in this short evaluation.

4. TEAM COLLABORATION & CULTURAL SYNERGY

Score: 7/10 (Moderate)

Collaboration Style & Teamwork Fit:
Based on academic consistency and project portfolio involvement, the candidate shows readiness for collaborative team environments, though direct observations of code review participation and cross-functional communication remain to be tested during live interviews.

5. KEY CANDIDATE STRENGTHS & VALUE MULTIPLIERS

- Exceptional academic performance (9.25 CGPA at VNR VJIET)
- Versatile technology stack covering both web development and AI/ML
- Strong foundational knowledge of data structures, algorithms, and core CS concepts

Growth Areas for 90-Day Ramp:

- Deepening practical experience with enterprise CI/CD and cloud deployment
- Refining advanced asynchronous JavaScript and state management patterns
